PROFESSIONAL SUMMARY

Mendix Advanced Certified Developer with nearly 5 years of experience designing, developing, and delivering enterprise-grade and SaaS applications using the Mendix platform. Currently contributing to Search Portal, an AI-driven, multi-tenant RegTech platform that enables compliance teams to research regulations and map regulatory requirements to rule books, obligations, and controls. Experienced in developing end-to-end application modules, covering domain modeling, microflows, nanoflows, page development, UI implementation, and role-based and tenant-level security. Strong focus on designing maintainable microflow architectures, implementing reliable REST API integrations, and owning features throughout the development lifecycle, from solution design to release.

PROFESSIONAL EXPERIENCE

CUBE (acquired 4CRisk.ai, Mar 2026) — **Bangalore, India**
Software Engineer — CUBE — Apr 2026 – Present
Software Developer — 4CRisk.ai — Sep 2025 – Mar 2026
AI-driven RegTech SaaS for regulatory research, change management and compliance mapping.

Project: Search Portal (multi-tenant RegTech platform)

- **Regulatory Research:** Worked on search across regulators, laws and standards with keyword and exact-phrase search, AI-assisted Smart Search, faceted and saved filters, and rule-book creation directly from search results.
- **Rule Books & Obligations:** Worked on rule-book management (roll-up levels, editing, organisation-hierarchy applicability, audit trail, export) and obligation generation from rule books.
- **Regulatory Change Management:** Delivered a configurable five-stage alert workflow (Scoping to Completed) with triage assignment, collaborator approvals and auto-linking of related alerts.
- **Compliance Map:** Worked on Compliance Map and Unified Compliance Map, mapping regulatory requirements to rulebook, obligations, policies, controls, risks, issue and controlObjective to show compliance coverage and gaps.
- **Security & delivery:** Worked on role-based and organisation-level access with tenant data segregation; own features end to end in Agile sprints with peer code reviews.

Intelizign Lifecycle Services Pvt. Ltd. — **Chennai, India**
Software Engineer — Mar 2022 – Aug 2025
Mendix and Microsoft Power Platform delivery for enterprise clients, including Daimler India Commercial Vehicles (DICV).

Project: I-Manage (Org-Management)

- Designed project and resource allocation of employees to projects and delivery groups, with cost and revenue analysis.
- Built consolidated reports and Apache ECharts dashboards for leadership; Excel import/export for bulk updates.

Project: SWIFT-VOB (Vendor Onboarding)

- Developed business forms in Mendix to capture and manage information required for the vendor-related business process.
- Implemented form submission and approval processes to route requests through the required approval stages.
- Supported the final approved document-sharing process with external suppliers, ensuring approved information was available to the relevant stakeholders.

Project: Delegation of Authority (Approval Workflow)

- Delivered document-approval and delegation workflows with request tracking, escalation, reviewer comments and email notifications.

TECHNICAL SKILLS

Mendix: Mendix Studio Pro, Domain Modeling, Microflows, Nanoflows, Pages and Layouts, XPath, OQL, Java Actions
